Cadorath Aerospace reports a 100% increase in Bell Repairs in 2011

Winnipeg, Canada – Cadorath Aerospace’s list of Bell repair capabilities increased by 100% in 2011, making Cadorath the fastest growing “Bell shop” in the world.

“At Cadorath, our commitment to excellence is moving us forward. Our vision of becoming a global company driven by integrity, solutions and satisfaction is being embraced by our customers because they see our core values in action – and they’re spreading the word.

“Customers trust that our well-trained team will help them reduce costs and increase productivity. We take pride in our ability to respond quickly to ever-changing customer and regulatory demands,” says president and CEO Gerry Cadorath.

In addition to growing its list of capabilities, Cadorath Aerospace is constantly looking for opportunities to exceed customer expectations and improve customer experience. For example, during repairs, Cadorath has full control of the repair; it remains in-house the entire time.

Gerry Cadorath attributes the company’s success to a simple idea. “In a brick and mortar business,” he says, “you can have the best products and systems in place, but it’s passion that makes the difference. Our people are committed to our customers, our products and safety. It’s what enables us to provide peace of mind to our customers.”

We are at Heli-Expo 2012! Visit us at booth #5024.

Cadorath Aerospace is a wholly owned subsidiary of the family-owned and operated Cadorath Group of companies, based in Winnipeg, Manitoba. The Cadorath Group provides superior solutions and products to its global client base through its companies: Cadorath Aerospace, Cadorath Distribution, Cadorath Coating, Cadorath Leasing and Cadorath Unifyte.
